Assessment for Full Stack Development

Task

The assessment will consist of two tasks. Each of them tests your capability to manage time and your expertise in full-stack development.

1. Create an HTML E-Mailer:

Require clickable slices that can be redirect the user to the links attached. The reference has been provided for the final look of the mailer. **Assets: [Click Here](#)**

This task will be evaluated based on the following criteria:
A. Time
B. Code Format
The reference for the HTML mailer is attached in the mail sent to you.

2. Create and animate **two sections** of a website:

This task requires you to make these sections responsive for a standard mobile screen.

Landing Section and Sidebar- You have been provided with a Figma file consisting of the layout. You are required to construct the layout and make the webpage responsive as per the prototype given below.

Figma File: [Click Here](#)

This task will be evaluated based on the following criteria:

A. Time
B. Code Format
C. Accuracy in replicating the Design
D. Responsiveness

Kindly note that you will be provided with the necessary assets to build the aforementioned sections of a sample website
